Snitter is a Twitter application for Mac OS X which provides a simple means of keeping in touch with your friends and for posting your own tweets. Snitter's main function is to allow you to add new Twitter users to your Snitter list. Besides adding friends to your list, it also provides options to view, reply, and retweet the Tweets from your own list. Snitter's other functions include adding users that you follow, deleting users from your list, viewing the users on your list and performing searches of your

---

list. Snitter Features: 1. Add and View Friends: Snitter allows you to add the friends you want to have in your list. Although the user has to be added manually, you can use Snitter's search function to find new friends. It also allows you to view the friends you have in your list. 2. Adding New Users: Snitter allows you to easily add users by typing in their Twitter usernames into the search bar. The users are added to your list and Snitter searches Twitter and all their Tweets to show you the new user profile. 3. Viewing Users: Snitter allows you to view the users on

---

your list. Snitter allows you to see the number of followers and friends the user has, and any Tweets that were retweeted by the user.

4. Viewing Changes: Snitter allows you to view the changes that have been made to your list. When the user adds or changes his/her profile the changes are shown on your list. You also have the option to see a screen shot of the user.

5. Deleting Users: Snitter allows you to delete any users from your list. To delete a user, click on the user's name to select it and press Delete. You also have the option to delete the whole list.

6. Deleting Tweets:

---

Snitter allows you to delete a Tweet. To delete a Tweet, click on the Tweet to select it and press Delete. Snitter also allows you to delete the user from your list. This Snitter tutorial will show you how to install Snitter on your Mac. ----- "Snitter is a simple tool for chatting and updating with Twitter. The main idea is to use Twitter as a quick and easy way of communicating to multiple people at the same time. You can use Snitter to chat with friends, family, and new people on Twitter, including your own followers. Snitter can also post messages for anyone that you follow and is a great way to keep up to date with friends and family in a simple, friendly environment." -Credits at the developers website. The application is fully customizable and allows you to view the Twitter

---

icon as an "entertainment" item and to hide it in other applications (such as Eclipse). Moreover, Snitter also offers the possibility to integrate your own Twitter account within its interface. Snitter offers the opportunity to communicate with other Twitter friends via the application. It displays Twitter friends in a list and allows you to "ping" them or add their Twitter account to the application contact list. If the application cannot find your friends, the list will be updated with your recent tweets (if you configured this in the preferences). You can also use the

---

application to update you own  
Twitter account or change the  
image used to show in the  
application interface. More  
information regarding Snitter is
