There are 2 ways to do this: - Via a simple form (requires no installation) - Via a PHP script (requires no installation, and the trackers own PHP script is required) Stats Description:

What's New in the TorrentTrader?

TorrentTrader is a tracking & site management software for BitTorrent. It is a powerful, flexible and easy to install tracker & site management tool. TorrentTrader is a specialized site & tracker for private torrent sites. It was initially designed to be a TorrentBitTorrent tracker. The tracker can be used with all major P2P clients. TorrentTrader can be run both as a tracker or as a site. It is possible to set up a tracker with the homepage of your own site. Users can subscribe to your tracker with the tracker control panel of TorrentTrader. TorrentTrader was designed to be as transparent as possible. Everything you need to configure the site is located on the management control panel. Usability TorrentTrader is a perfect and very user-friendly tracker. It is easy to setup, manage and maintain your tracker. You can make the tracker admin panel to fit your needs. The script is made of only PHP and MySQL files. It is easily extendable and customizable. The templates are included. This means that you can create your own front-end with your own designs and themes. Advantages It can run as a tracker or as a site. Highly customizable. Small size. Built-in themes. Can track both public and private torrents. Community-based and open source. TorrentTrader is built with security in mind. Admin backend supports flexible user permissions. TorrentTrader uses the MySQL database. Best of all, TorrentTrader is free. TorrentTrader Installation TorrentTrader is a PHP / MySQL tracker which runs on both Windows and Linux platforms. You can download and install the torrenttrader.tar.gz directly from this page. A new site has to be created. The forum will be hosted in a separate subdomain of the tracker. TorrentTrader will also need to be accessible via web address. The database will be created with sample data. The forum will be publicly accessible. The tracker will not be accessible by the public. Private torrents can be tracked. TorrentTrader Requirements PHP 5.0 or higher MySQL 4.0.x or higher PHP-GD 2.0 To be able to run TorrentTrader, your server has to have at least 32 MB of RAM, more than 5 MB of RAM should be preferred. TorrentTrader is an open source project and is released under the GNU GPL license. New Features and Improvements Version 1.0.1 (27/06/2010): Added IP filtering. Added proxy support. General code changes. Version 1.
