It's time to test your knowledge of the horror genre. This series pits horror fans against each other in multiple choice questions. If you're reading Fangoria, you already have a good idea of what horrors we're talking about, but if not, check out the hints below. Want to play along? Vote in the poll at the end of the article. In the realm of horror, there are more than just movie monsters. Legendary creatures have certainly had their turn on the big screen, but they've also been featured in the world of video games. The latest entry to this list comes from the Evil Within 2. A team of scientists has developed a strange, transparent stone that emits a strange light in colors that aren't found in normal light. They also create a strange looking creature when exposed to the stone. What is it? Grote werk van de universiteit is het creëren van inhoud. Jullie laten nu een tijdje de universiteit varen. Meer dan zo'n tien jaar geleden hielden universiteiten haar status om een tijdje klaar te hebben op de universitaire wereld. Het aantal studenten en docenten groeide, jongeren werden er mee geconfronteerd en de instituten vonden met ellende gepaard de gebouwen nieuw. Niet voor niets is in dit stadium steeds meer geïnvesteerd in research en ontwikkeling, dus er zitten nu ook genoeg middelen over. De voornaamste kern van het universiteitsbestaan bestaat nu in het achterhalen en het creëren van doelgerichte inhoud. De traditie van het onderwijs is pas sinds enkele decennia aan het glanzen en het veranderen, te beginnen met de eerste universitaire intekenaren. Q: WebStorm tool window doesn't resize as often as expected I'm using WebStorm 11 EAP and I'm noticing something strange: when I open a tool window, its contents will not resize to fit the new window size. I'll be trying to scroll down, or click in the title bar, and nothing happens. I'm sure it's something I did - either I messed around with the settings, or I'm making some mistake. But I'm not sure how to diagnose it. I haven't modified anything about how my dev environment is set up. I even turned off the setting about Auto-resizing windows, with the idea that it wouldn't happen anyway. Any ideas? A: Try this: File > Invalidate Cache/Restart. (From my "recent" box in Windows 8.1.) (PS: The refresh button is a hamburger icon. For some reason the menu doesn't show up for me in the running IDE, so I use the Find menu, then Shift+F2.) A: I experienced a similar issue with my IntelliJ IDEA 12 Ultimate and a related plugin. I had to restart IntelliJ to make the changes take effect, press cmd+shift+R (restart) or click the Refresh button on the toolbar (at the bottom of the window) or double-click the top-left icon in the toolbar Checked and verified the restart command again and all was working fine. Not sure why this needed to be done but for me the issue was resolved with this. A: This can happen when the IDE is not entirely updated. Either restart the IDE or restart the machine entirely, and it should be fine. Role of the acetylcholine receptor cluster in synaptic function and plasticity in the cholinergic basal forebrain. A role for the acetylcholine receptor (AChR) cluster in the cholinergic basal forebrain (CBF) has been suggested based on its colocalization with cholinergic markers in the area of the nucleus basalis of Meynert. Clusters of AChR have also been observed on the dendrites of hippocampal interneurons. Whether the acetylcholine-binding sites, one of the components of the AChR cluster,
