### What's New in the?

Markup assist lets you use AutoCAD directly to change the location of blocks and text in a drawing so you can add details that don't exist yet. (video: 2:00 min.) Tagging Objects with Taglets: Synchronize tagged drawing objects with their tagged annotations, so every change to an object's tag also applies to its annotation. Use the tag keys: taglet, annotation, and tag – it's all in one convenient place. (video: 1:00 min.) Tags are now automatically preserved and restored when you open a drawing on another machine. (video: 2:00 min.) Navigate the Navigator Panel: The Navigator panel was designed with CAD professionals in mind – with a custom-keyed (and animated) panel to quickly navigate drawing objects and their sub-elements. Add custom navigation panels to the Navigator panel and assign keyboard shortcuts to the panel navigation commands. (video: 1:30 min.) Working with Tags: Managing your drawing tags and your most important drawing objects together with a tag-based drawing style makes managing your drawings much easier. Get new tagging and navigation tools in AutoCAD at no additional cost. (video: 2:00 min.) The Quick Cloning feature lets you make exact duplicates of objects with a single mouse click. Just create a new, clone-based, copy drawing, and select the objects you want to clone – that's it! (video: 1:30 min.) The Copy Drawing Tool is now available for drawing objects on the command line. Quickly create a new, clone-based, copy drawing for objects on the command line. Just create a new, clone-based, copy drawing and select the objects you want to clone. (video: 1:30 min.) The New Layer Wizard: The New Layer Wizard helps you choose the right drawing settings for new layers. Select the settings that are appropriate for the features you want to draw in a new layer – such as lines, arrows, text, and so on. (video: 1:30 min.) The New Layer Wizard is now available in the 3D modeling tools – you can now choose the appropriate 3D settings for layers that you add to your 3D models. (video: 1:30 min.) Automatic object tagging is now available for the X
