WeHTMLtoPDFConverter.exe * HTML to PDF converter Hi, I found this software and think I need it. I am able to convert simple HTML to PDF just fine, however what I need to do is convert a large number of pages to PDF within one action. Also, I have a folder with a large number of sub-folders and would like to recursively convert them to PDF (again, with one action). I'm very new to VB.Net, so I don't know how to program in that language, but I'm sure there's a way to do it. Is this possible, and, if so, how? Thanks for the help.
