All of the above shows are the same movies (in 1080p HD) that are already available in standard definition (that is 720p). My friends and I want to build a dedicated PC for watching movies in HD, but we cannot afford it yet. Because we are all students, we want to build our system at a lower cost. So, we want to build it from books and hard drives. When we go to the store, we look for hard drive 3.5" with a SATA interface and, as a matter of fact, we find a lot of them in low cost hard drives. The thing is, we have no idea which one is the best one. What we want to know is which drive is the best, based on the following criteria. Hard drive size: 3.5" Hard drive speed: 7200 RPM Unsure: which power supply will it use? Unsure: which cooling system? This is not a typical video review.
