What's New in the Windows Media Player Plus!?

DJ Viewer can solve a wide variety of music problems. It offers a lot of new features and works really well with your Windows system. It's just as easy to use as your media player -- just click the mouse. What's more, with DJ Viewer you can modify the files to make them do what you want. You can do amazing things like load a song into a slide show, or create new, modified tracks using song IDs from last.fm, and even play them in WinAmp. It works with Winamp 2 and up, and with Windows Media Player. It's very easy to use, and you can even play and edit your music while it's being downloaded. This advanced MP3 music player has everything you could want: playlists, ratings, songs, album art, band, artists, albums, genres, images, videos, charts, music search, lyrics, last.fm scrobbling, customizable filters, and much, much more. VLC Player can play most multimedia files as well as many other formats, from MP3 to DVDs to.wmv to Matroska and much more. VLC Player can record any window and stream real-time video to the web. It supports the most common controls for power management and can be controlled through VLCscript. TrackBack is a built-in media player for Windows ME/98/2000/XP. TrackBack is the successor of DreamPlayer, the standard

media player of the Linux Mandrake operating system. TrackBack is not an application but can be used in an existing player like Windows Media Player, Winamp or RealPlayer. TrackBack supports embedded videos, images, Flash, FLV, AVI, MPEG and many more. It supports all the modern browsers and does not require Flash installed. Yahoo! Music Manager is a music player and media manager for Windows. It is the successor to Yahoo! Music Manager, which Yahoo! discontinued in 2000. Yahoo! Music Manager now has several features that were not in its predecessor. Yahoo! Music Manager, once installed, is accessible through the My Yahoo! menu. It's also available as a stand-alone application and as a plug-in for Windows Media Player and other media-playing applications. Yahoo! Music Manager uses the same API of WinAmp, it can support MP3 audio formats through WinAmp decoder. Easy Player is a full-featured media player for Windows with a user-friendly interface.
