---

## TMPGEnc Video Mastering Works

TMPGEnc Video Mastering Works is a professional video encoding and authoring utility for Windows, supporting large video files (up to 8K resolution), and various editing capabilities (with multi-layer timeline structure, separate audio and video profiles, and scalability for playback on mobile devices, etc). TMPGEnc Video Mastering Works is a tool for those who demand the utmost quality in video creation and compression. The software's functionality can handle large video files, and offers cutting-edge functionality from the most advanced video and audio encoders, such as h264, mp4, avi, mkv, mov, m2ts, 3gp, wmv, flv, and mng. Features High Quality Keep a great quality in your videos with the ultimate H.265/HEVC encoding support. HDR/SDR/DR In the HDR / SDR / DR (High Dynamic Range / Super Dynamic Range / Dynamic Range) mode, TMPGEnc Video Mastering Works handles both the SDR and HDR video types, when they are available. You can separate and select a single or range of frames to capture a wider range of colors. MovieScaler In the available HDR / SDR / DR mode, TMPGEnc Video Mastering Works offers a feature called MovieScaler, which allows you to extract only the needed color from a scene. Faster Processing TMPGEnc Video Mastering Works speed up video encoding and conversion processes through its dual-core processor. Efficient Code Optimization Save your time and storage space by capturing only the background, and display only what is important for the scenes, by optimizing your encoding code. Features like anti-aliasing and de-noising, as well as background subtraction methods, offer a high quality for video capture. For fast encoding, TMPGEnc Video Mastering Works (16-bit color mode) has video and audio profile setting for GPU encoding, and multi-core processing. - Super-fast multi-core processing when you first launch TMPGEnc Video Mastering Works - TMPGEnc Video Mastering Works (16-bit color mode) has a Video and Audio profile setting for GPU encoding - Supports setting of the following video profile: 1920x1080 (1080p) 720x576 (576p) 1080x720 (720p) 1440x1080 (1080i) 1440x900 (720p) 1280x

### What's New In TMPGEnc Video Mastering Works?

The TMPGEnc Video Mastering Works application is a full-featured video and audio editing software with a familiar structure, designed for simple use. It is packed with advanced video features, powerful video and audio encoding and conversion, and gives you the option to view the media content both as it's encoded and while it's being converted. Translate video files and work with 3D-oriented content In addition to the video encoding and conversion capabilities, the application can also be used as a translator of video files. Whether you need to convert a footage file to a different format, transcode to a different codec, or simply edit video using a 3D video editor. The app has powerful video transcoding capabilities. So, you can easily perform video conversions from MP4 to MP3, MP4 to MOV, XAVC, AVI, MKV, etc., as well as work with other video formats (RAW, BGR, H.264, MPEG-2, and others). In addition, you can easily perform encodes (H.264, H.265, HEVC) and audio encodes (MP3, OGG/Vorbis, FLAC, AAC, WAV, etc.). Video 3D editing, watching, and viewing The interface of the application is more sophisticated and user-friendly than that of the TMPGEnc Free Video Mastering Works. Also, it provides more-powerful functionality, including its own project management (MOV, AVI, MKV, etc.), file management, content-specific QuickTime editing, export for various multimedia files (with dozens of output formats), and advanced user-friendly and intuitive editing. The application works both as a 3D editor (MOV, AVI, MPG, etc.) and as a movie viewer. And you can use 3D content to perform editing operations that would normally be impossible, like for example: cutting, trimming, and cropping video, adding transitions, stabilizing and applying effects (e.g. color correction), adjusting audio, etc. Key Features: • Output video formats: (\*\*NEW\*\*) TRUECOLOR (\*\*NEW\*\*) RAW (\*\*NEW\*\*) HEVC (\*\*NEW\*\*) SVC (\*\*NEW\*\*) FPY (\*\*NEW\*\*) BGR (\*\*NEW\*\*) XAVC (\*\*NEW\*\*) DNxHD (\*\*NEW\*\*) DNxHR • Video codecs: AVCHD, XAVC

---

**System Requirements For TMPGEnc Video Mastering Works:**

1) All games listed here require the Battlelog client (found in the applications) to be installed, and running in order to play the game. 2) Due to the nature of the multiplayer games listed, there is a requirement that you have at least 1GB of free space in the "C:\Users" folder of your Battlelog installation, and 2GB for the Steam installations. This is in addition to your hard drive space requirement, which we have listed below. 3) Please ensure that you have internet access via a broadband connection in order to download
