So, you can clone the main movie content, full disc or split the DVD into two D5 discs. You can view technical details, such as movie size, audio channel, subtitle number and aspect ratio. When it comes to the output DVD, you can use and configure the DVD writer, or copy contents to the hard drive (by specifying the target), as well as enable a temporary working folder. In the "Options" menu, you can select the target DVD size, set the tool to delete temporary files when finished, as well as select videos, audios and subtitles. We suggest you test it for yourself. It wouldn't let me try to burn the ISO file to my dvd, is there a way to use the ISO file to burn the contents of the DVD? I am not clear on your question. Can you rephrase? "It wouldn't let me try to burn the ISO file to my dvd" - If the ISO is a disc image (an iso is simply a self-contained disc image (right?)), then yes - you can burn it to a blank disc. Also, if you had another disc burning program installed, then you could also burn the iso to a blank disc. "use the ISO file to burn the contents of the DVD" - Yes, the DVD is the contents of the iso file. Just follow the directions in the Burning topic and you should be all set.
