2. Create new features
3. Understand the usage of new features (when it's released to public)

Description Create an office editing software using Microsoft Office as its basic feature. The software will be useful in any personals and professional company having Microsoft Word and Excel files from both clients and employees. The program will find out all the users' clients and employees by clicking them, then search and replace texts in documents. It will also change the formatting of documents in them, save them back and revert the changed drafts back. Utility Manages Office documents of its registered users and their clients Finds all the documents from the desktop folder, email folder, shared folder, uploaded folder and network shares like FTP and SCP, and gets them all. Manages the documents in those documents. Throttles the user: each new document will be the one that the user most frequently uses. Change the name of the file: the title is one of the most important data of document, so this function will change the title, save the changes and revert to the original format. Change the date or the time of the 6a5afdb4c
