What I'm looking for is to get this list saved as a new CSV file or database that I can read into a new ArcGIS database, preferably in Python. UPDATE: Using JSON as suggested by @anubhava, I came up with the following code, which I tried and validated in JSONLint: cursor.execute("SELECT * FROM PREY_RAW") json_text = "" for row in cursor: row_list = row[0].split(',') json_text += ""%s", "%s" " % (row_list[0], row_list[1]) json_text += "," with open(json_filename, 'w') as outfile: outfile.write(json.dumps(json_text)) However, running this script, I get the following error message: Traceback (most recent call last): File "", line 1, in TypeError: 'NoneType' object has no attribute 'split' If I try replacing the for row in cursor: line with cursor.execute(), it gives me the error: Traceback (most recent call last): File "", line 1, in File "/usr/local/lib/python2.7/dist-packages/pymysql/connections.py", line 312, in execute raise exception File "/usr/local/lib/python2.7/dist-packages/pymysql/connections.py", line 296, in execute return self._cursor.execute(query, args) File "/usr/local/lib/python2.7/dist-packages/pymysql/cursors.py", line 179, in execute result = self._query(query) File "/usr/local/lib/python2.7/dist-packages/pymysql/cursors.py", line 325, in _query conn.query(q) File "/usr/local/lib/python2.7/dist-packages/pymysql/connections.py", line 728, in query 82138339de
