It gives you full control of the music playing on your iphone. You can pick your preferred playback rate, you can pick a format, or you can manually select from a list. It's compatible with any device that is capable of playing audio. And the best part is that it's free to use. I love this app, it's easy to use, and does exactly what it says it will do. For anyone interested in a simple, and effective audio player, this is the app for you. By jhss
