result, this application will not only save you precious time by automating and streamlining all your database maintenance tasks, it will also help you achieve higher levels of performance and data integrity by giving you full control over your database backups. It is compatible with all major versions of MySQL and Apache, including MySQL 5.0, MySQL 5.1 and MySQL 5.5. Furthermore, this software includes both a web-based

---

interface and a command-line version, so it can easily be integrated with your existing PHP and Perl applications. You can create regular backups with this database backup utility, or schedule them to be performed automatically. Once you have created the tasks and set their intervals, you can let the application run automatically to back up your databases. Also, the application includes a powerful task scheduler that lets you define

---

the frequency at which you want to execute the backup tasks. You can also export the backup files to a location of your choice. The program also makes it easy to restore the database from a backup. In addition, you can view the backup files, change them, or even delete them as necessary. This program can also restore a database from a single file, as well as from a SQL file. This online tool is compatible with all major web hosts and has support

---

for Windows, Linux and Solaris operating systems. It is a secure, reliable solution, and it will not only enhance your database performance, it will also save you valuable time and money. .
