Whichever version you choose, you should take some time to learn this powerful image editor and use it to manipulate images for all kinds of situations. If you're a beginner, you can start by learning Photoshop's basic workflow. If you're looking to learn about more advanced features, the following infographic summarizes Photoshop's most useful tools and a handful of its most popular features. Photoshop's Best Tools 1. Image Editor Photoshop allows you to do just about anything with an image. It has a large number of powerful tools to work with it, making it an essential tool for a wide variety of graphic design and photo editing tasks. 2. Load a File You can load any of the image formats that Photoshop supports. However, it's useful to learn that some image types are proprietary to Photoshop and the people who make the software. A great way to figure this out is to use the "Save for Web" and "Save for Devices" dialogs. 3. Layers You can perform a variety of image manipulations using layers. One of Photoshop's most useful features is the ability to change the opacity of a layer by clicking on the layer, and then clicking on it again to bring the layer back to its original opacity. This is often the preferred method for changing opacity in a layered image because if you have other layers on top of the layer you want to work on, you can change their opacity, return them to the original position, and then move on to the layer you want to work on. 4. Paths A path is a series of connected pixels that makes up a vector image. Photoshop has two types of path, a vector path and a raster path. It is very important to get into the habit of using vector paths, because raster paths are less precise and may be less efficient than vector paths in some situations. 5. Clipping Mask The concept of a clipping mask is to use a layer as a mask that hides all of the pixels underneath it. When you have a clipping mask, you can change the pixels that are visible and the other pixels are not, which allows you to change the opacity of a layer. 6. Adjustment Layers Adjustment layers let you change the properties of your image directly, without the need of closing and reopening. 7. Filter Filters are different ways to change

'Who was that?' Hillary Clinton's 'Hook' Questionnaire draws ire from Gillibrand As a new book about the 2016 presidential election is set to hit shelves this fall, one writer is claiming a connection between Hillary Clinton and President Donald Trump. In a column for Politico, Jill Abramson, who worked as the executive editor for the New York Times during the Bill Clinton presidency, said that Hillary Clinton and Donald Trump are "duplicates," referring to the "pernicious" relationship between the two throughout their careers. Advertisement "They are clones, more than 200 years apart, with the same goals and instincts. They are duplicates, much older than they seem. They are the originals," said Abramson. The author added that Trump's presidency has been a "reflection" of the Clintons, saying, "Donald Trump is Hillary Clinton. Hillary Clinton is Donald Trump." The column was quickly panned by former Clinton staffers and surrogates, including Hillary for America communications director Jennifer Palmieri. "I can't believe they would write this," Palmieri wrote on Twitter. "Either they hate women or they don't know what they are talking about." In the column, Abramson paints the former presidential candidate as a hyper-aggressive woman whose attitude was best represented by Clinton's ability to use the infamous "who's that woman?" line. "It has been, and remains, one of the most vicious campaigns in US political history," she writes. "We think of Hillary as 'old,' but she is actually a young woman — 'seventy-six is such an old age for a woman,' Trump supposedly said, on equal terms, to a reporter. 'But Hillary is playing the woman's card very strongly,' he continued, confirming what they both knew — that Hillary Clinton was getting the last laugh on Donald Trump. "Trump was paraphrasing a line from the Lady Macbeth play, that celebrated evil, uttered by the nurse, Lady Macbeth, to her husband. 'Look, the blood of my heart is thine,' she told him. 'Look, here's the handkerchief,' she said, 'out of which thou didst these wounds dipp." Abramson also claims that Hillary Clinton's husband "is a political assassin, the most evil man of our time" and that she "wants to be more than a wife — if you believe what you
