Adobe Photoshop Elements 6.0.2 Product Key.Q: CakePHP only root password I'm using the CakePHP 2.3 framework with codeigniter in a site with a rest API. Is it possible to add a feature that only the root user is able to access the root? A: I suggest using.htaccess to block access to the API while keeping the standard site accessible. Ex:  
RewriteEngine on RewriteCond  
%{REQUEST\_METHOD} POST RewriteCond  
%{REQUEST\_URI}!^\\vapi\\.\*\$ RewriteRule ^(.\*)\$  
/api/index.php [L] Which should block access to the API if the request is a POST and the URI isn't

entirely /api/.... If you want to be able to access the API without connecting as the root user you can override the base function of your Controller to allow that behavior: public function beforeFilter() { if (!\$this->Auth->user('ROOT\_PASSWORD') && \$this->Auth->user('ROOT\_PASSWORD')!= \$this->Auth->user('CakePHP.Security.admin.password')) { throw new AuthException(); } } You'll need to make sure the configuration of that variable is 'ROOT\_PASSWORD' and not the actual password to access the API. These 2 examples are excerpted from the code in the documentation of the Auth class.
