Q: Get IP address/Netmask from OpenVPN connection in Plink Is there a way to get the network configuration details of the VPN connection from Plink? I know I can use the netstat -r to find out the server's IP address, but I'd also like to know the netmask and gateway IP, from which I can derive the local IP range. A: From Plink wiki: The following command line options are available: -m - process netstat -r output -P - process system/program information -D - display current working directory For example to get OpenVPN server's network info: plink -m 2>/dev/null -P -D -aiS= (the server's Netmask is not displayed, but I guess you can find it in the output) A: The nmap command has a -O command-line option: \$ nmap -O A: Get the netmask and gateways with the following
