Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children. Is there any working official website that offer free robux? We were able to find some working websites that show free robux generator, but these websites are usually hacked. How to generate free robux codes at no risk? Are there any different ways to make free robux codes? A: If you read at Roblox's corporate wiki, you will see that there are very strict reasons why they do not allow robux to be generated for players. If they did so, they would not have their well-established virtual economy. They will most definitely charge for anything that could be considered a scam. In short, they have chosen to forbid what they see as cheating. A priori, if you were concerned with generating robux on a private server with your friends, this would be a different story, and you could do that without their interference. Even if they would ask you to stop, they would not really have any reason to stop you, if you did not try to trade with the generated robux.
