Thank you for your comment Peter, In the future, when we do have a full stand-alone/cloud appliance version of ABAP it will be based on the standalone edition of 7.50. This has just been released and is available for download from the ABAP Sandbox. For now, your readers can download the latest standalone 7.52 and try this version of the GUI:, if they like it they can just download this version. There will be an appliance version in the future. I don't agree with you that the ABAP sandbox has to focus on new languages. It should focus on new functionality. As I stated above we have a new ABAP GUI and it is available here for free download from the portal or via the sandbox.

The new GUI is based on a new platform (cloud) and offers a new platform for developers and admins. Its more for your readers to think about, if they would like to use a new GUI for 7.50 instead of 7.52. You can download the new GUI via the sandbox here. the superior feature of this program is the ability to download the subtitles and audio tracks of videos from the web. if you have an issue with your computer, then you can also download the best antivirus software for your computer. takke this video right away please! i think the best thing in this app is the option to set the device to "silent" mode when it is downloading. this way you can check the download, if everything is fine, without getting a notification from the phone. i can recommend this app for everyone, if you want to download any videos from the internet. 5ec8ef588b
